LIBRARY

FOREWORD

This volume contains the latest available information on all the important aspects of the Hungarian Armed Forces. Sections I to V explain the basic organization and the mobilization and training systems of the Army. Sections VI to VIII give information about uniforms, equipment, and conventional military symbols. Section IX is a note on the Navy (River Forces), and section X is concerned with the Air Force. Sections XI to XIII give the more transitory information on the identification, composition, and commanders of specific units of the Army, constituting the order of battle in the narrower sense.

Section XIV is a glossary of military and related terms in Hungarian, with common abbreviations, and their English equivalents. It is designed merely as an aid to intelligence personnel in the evaluation of documents in the field. No attempt is made to indicate the intricacies of the Hungarian language.

In addition to order-of-battle studies, various handbooks, and miscellaneous publications, the Military Intelligence Division issues the following:

- Tactical and Technical Trends* (monthly);
- Intelligence Bulletin* (monthly);
- Military Reports on the United Nations* (monthly);
- Special Series* (approximately once a month).

Requests for additional copies of any MID publication should be made through channels.

Comments on this publication, as well as on the MID publications listed above, should be transmitted promptly and may be addressed directly to the Dissemination Unit, Military Intelligence Division, War Department, Washington, D. C.

Section I. INTRODUCTION

1. GOVERNMENT

Separated from the Austro-Hungarian Empire after the First World War by the Treaty of the Trianon, the Kingdom of Hungary is a constitutional monarchy without a king. Until some future time when a king is crowned, Admiral HORTHY Miklós¹ (see par. 52) rules as Regent. He is head of the government and Commander in Chief of the Armed Forces. In time of war he may appoint an army general as Commander in Chief (*Főparancsnok*), but none has been appointed.

2. GERMAN INFLUENCE ON THE ARMY

a. *Under the Austro-Hungarian Empire.*—Before the First World War the Austro-Hungarian Empire had 3 armies. Austria had its own *Landwehr*, Hungary had the *Honvéd*, while the army of the Empire was composed of officers and enlisted men drawn from both kingdoms. The *Landwehr* and the *Honvéd* were designed to be used within the territorial confines of the respective kingdoms and were considered as defensive troops. The Imperial Army was a first-line force and the pride of the Empire. It was quartered at 16 home stations distributed throughout the Empire and was recruited from quotas allotted to 16 districts. Its official language and its military traditions were German. At the end of the war, when the Empire was dissolved and Hungary partitioned, most of the Hungarian officers in the Imperial Army were commissioned in the new Royal Hungarian Army, still called the

¹The Hungarian practice of reversing given and surnames is explained in par. 50b, p. 96.

Honvéd although it was reconstituted as a first-line force. They brought with them the traditions and ideals of the Imperial Army and naturally perpetuated the German influence on the *Honvéd*. The Germans exerted great influence also on the trade of Hungary after the First World War and fostered the feeling that Hungary had been dealt with very unfairly at the Trianon. This idea, with the fear of Communism, led the nation to look to Germany for support and guidance.

b. Present.—When Germany embarked upon the Second World War, Hungary supplied the Reich with food and raw materials on the promise that Germany would help to restore the original Hungarian boundaries. Portions of Czechoslovakia, Transylvania, and Yugoslavia were actually restored; in return, Hungary sent troops to the Soviet Union. On their part the Germans organized the Hungarian effort and sent military missions and experts into Hungary. Hungarian trains carried German troops to the Soviet Union and the Balkans, and a German "rest camp" was established near Budapest. German control was finally tightened to a point where Hungary could no longer refuse cooperation without danger of the overthrow of its government by German troops and the loss of all independence. The Hungarians therefore adopted a policy of outward cooperation but passive resistance to complete domination. They consequently supply less material than they promise, and lately they have refused to send more troops to the Eastern Front. The Germans were averse to an open break at this time, when they were hard pressed elsewhere, and until recently, continued merely to exert pressure at the top without taking over the entire internal control.

3. COMPONENTS OF THE ARMED FORCES

a. General.—The Armed Forces of Hungary are composed of the Army, the Air Force, and certain semimilitary forces. (For the chain of command in wartime, see fig. 1.)

b. Army.—The Army includes the Ground Forces and the River Forces, which serve under the direct command of the Chief of Staff of the Army.

c. *Air Force*.—The Air Force is not a part of the Army but is under the control of the Commander in Chief of the Armed Forces in a position analogous to that of the *Luftwaffe* under the *Wehrmacht* in the German Armed Forces.

d. *Semimilitary forces*.—This group includes the Gendarmerie, the State Police, the Finance Guards, the Customs Guards, and the State Foresters. In time of peace they act under the appropriate ministries of the Cabinet; in time of war they become part of the general reserve which is incorporated into the Army and serves directly under the Chief of Staff.

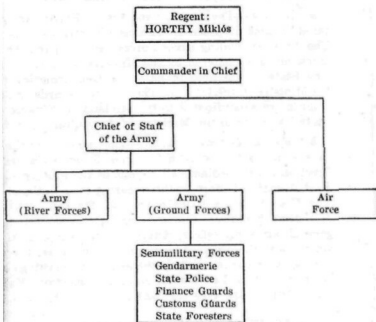

Figure 1.—Chain of command in wartime.

Section II. THE HIGH COMMAND

4. ADMINISTRATION OF THE ARMED FORCES

a. General.—The Hungarian Armed Forces are administered in time of peace by various ministries of the Cabinet. The Army (including River Forces) and, in part, the Gendarmerie are administered by the Ministry of National Defense. The State Police and, in part, the Gendarmerie are under the Ministry of the Interior. The Finance Guards and Customs Guards are subordinated to the Ministry of Finance, and the State Foresters to the Ministry of Agriculture (see fig. 2).

b. Supreme Defense Council.—The members of the Cabinet form what is known as a Supreme Defense Council, whose function is to coordinate all actions of the ministries, and indeed all national effort, in their bearing upon national defense. The Council meets twice a year at the call of the Prime Minister (KÁLLAY Miklós), who presides. The secretary general, an Army officer, determines the subjects to be considered and the order of business. His influence, therefore, is very great, since he controls the agenda of meetings and may advance or retard consideration of any question. Major General VÖRÖS Géza (see par. 52) now holds this post.¹

5. MINISTRY OF NATIONAL DEFENSE

a. General.—The functions of the Ministry of National Defense (*Honvédelmi Minisztérium*) consist of the administration of the Armed Forces and the formation of policies dealing with the war effort of the country. This ministry is

¹For a table of Hungarian Army ranks, see fig. 46, p. 99.

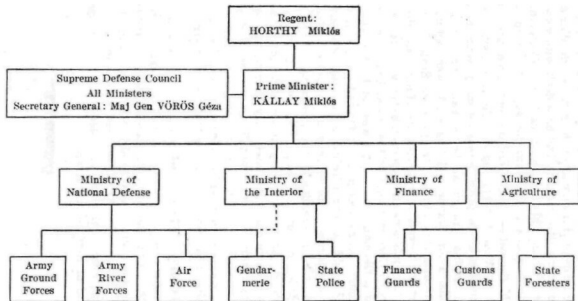

Figure 2.—Administration of the Armed Forces in peacetime.

composed largely of Army officers, some active and some retired, though some civilians are included. The minister himself must be an officer of considerable experience and in favor with the public. Colonel General CSATAY Lajos (see par. 52) is the present minister.

b. Organization.—The work of the ministry is divided among the following nine bureaus: ground forces, air force, supply, legal and civilian affairs, precedence, engineering (technical), welfare, accounting, and premilitary training. (See fig. 3.)

(1) *Bureau of Ground Forces.*—This is a policy-forming and executive body for the ground forces. It consists of four groups. Group I (sections 1, 9, 10, 19, 20, and 21) is concerned with administration, organization, mobilization, and training of the Ground Forces. It is charged also with matters pertaining to prisoners of war and internees. Group II (sections 4 and 8) is charged with personnel matters. Group VI (section 35) is concerned with the antiaircraft defense of the country. Group X (section 22) deals with veterans' administration and pensions.

(2) *Bureau of the Air Force.*—This policy-forming and executive body for the Air Force is divided into two groups. Group IV (sections 30 and 37) is concerned with the administration of the Air Force, the formulation of policy for the employment of the Air Force, and the supervision of all legal matters on expropriation and contracts. It is charged also with the administration of the HORTHY Miklós Fund. Group V (sections 13, 32, 33, and 34) controls the procurement, employment, and maintenance of aircraft, airdromes, armaments, and ammunition. It also administers the Air Force Budget.

(3) *Bureau of Supply.*—This policy-forming and executive body of the Supply Service is divided into two groups. Group III (sections 2, 3, 5, 6, 11, and 12) is concerned with the procurement, manufacture, and distribution of rations, clothing, horses, motor transport, and armament. It directs the con-

Figure 3.—Organization of the Ministry of National Defense.

struction and maintenance of military camps and posts, plans and directs the industrial mobilization of the country, and administers the budget of the Supply Service.

Group IX is composed of sections 3v and 17. Section 3v, the fiscal service, should not be confused with section 3 (under group III of the Bureau of Supply), which deals with the procurement of armament, motor transport, munitions, etc. Section 17 has four subsections, each the equivalent of a normal section. The first, headed by a colonel of the General Staff, is concerned with matters of policy in industrial mobilization, and with the passive defense of industrial buildings. The other three subsections, each headed by a colonel or lieutenant colonel of military engineers, deal respectively with the manufacture of war matériel, with the manufacture of individual equipment, raw materials and salvaged materials, and with the organization and direction of aviation factories.

(4) *Bureau of Legal and Civilian Affairs.*—This bureau, which is staffed entirely by civilians, consists of group VII (sections 14, 15, 16, and 18), and is concerned with the administration of all civilian employees of the Ministry of National Defense, the interpretation of laws, the compilation of draft lists, and deferments and exemptions.

(5) *Bureau of Precedence.*—This bureau has charge of the internal administration of the Ministry of National Defense and regulates the etiquette and the religious observances of the Army.

(6) *Bureau of Engineering.*—This bureau prepares plans for military constructions and fortifications. The chief must be an engineer but not necessarily an officer in the Army.

(7) *Other bureaus.*—The Bureau of Welfare looks after the welfare of officers and enlisted men; the Bureau of Accounting administers the budget of the Army; and the Bureau of Premilitary Training, consisting of group VIII (section 40), directs the premilitary training of the country and the national youth organization, the *Levente*.

6. GENERAL STAFF

a. Organization.—The Chief of Staff of the Army (*Vezérkari főnök*) commands the Army under the Commander in Chief of the Armed Forces. Colonel General SZOMBATHELYI Ferenc (see par. 52) is the present Chief of Staff. His chief assistant, the Deputy Chief of Staff, is Colonel General BAJNOCZY József. The Chief of Staff is advised also by the inspectors of the various arms and services. The inspectorates were abolished shortly before Hungary entered the war against the Soviet Union, in the belief that sufficient directive work could be carried out in the training camps of the different arms. The need for a better training directive, made evident during the course of the war, led, however, to the reconstitution of the inspectorates in March 1943. At present there are seven inspectorates: Infantry, Cavalry, Artillery, Engineers, Armored and Motorized Troops, Troop Trains, and Signal. The Chiefs of the Air Force, the River Forces, and the Anti-aircraft Defense function also as inspectors of their respective commands. The General Staff proper is divided into two major groups, Operations and Training, and two bureaus, the Bureau of the Prosecutor and the Bureau of Discipline. (See fig. 4, p. 10.)

b. Operations Group.—The Operations Group is the largest and most important staff office of the Armed Forces. It is almost a General Staff in itself, and corresponds in general to the U. S. War Department General Staff, including all the staff functions except training. It consists of the following five sections: I, Planning and Strategy; II, Intelligence, Counterintelligence, and Relations with Foreign Military Attachés (the function of the head of this section, at present Colonel KADÁR, is roughly comparable to that of the U. S. Assistant Chief of Staff, G-2); III, Supply; VI, Press and Propaganda; and VII, Railway Communications, Chemical Warfare and Engineers, and Signal Communications. Each of the subdivisions of section VII is headed by a colonel of the General Staff, and is in itself as important as any of the other sections of the group.

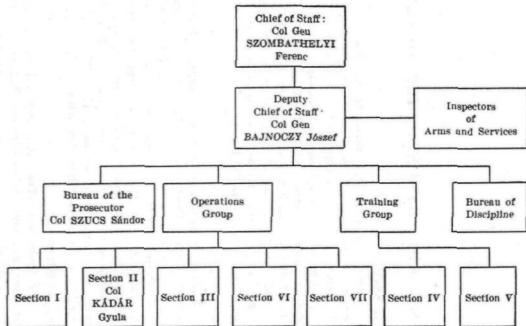

Figure 4.—Organization of the General Staff.

c. Training Group.—The Training Group consists of two sections. Section IV directs the instruction of senior and General Staff officers, scientific and technical research, and military publications; section V directs the training and instruction of troops and supervises military libraries and military sports.

d. Bureau of the Prosecutor.—This bureau handles questions involving military law and procedures concerned with its administration. It furnishes officers to sit on charges prepared by the Bureau of Discipline.

e. Bureau of Discipline.—This bureau prepares charges on matters dealing with discipline and affairs of honor in the officers' corps.

f. General Staff Corps.—The General Staff Corps is considered a separate arm or branch of the Army to a greater extent than in the U. S. Army. Officers of the Corps, who must be graduates of the General Staff School at Budapest, serve on the General Staff and, in limited numbers, are assigned to troops (about three to an army corps and possibly one or two to a division). They are not necessarily restricted to staff duties as distinct from command, and many troop commanders from the General Staff Corps have become general officers. The Chief of Staff of the Army is Chief of the General Staff Corps.

Figure 5.

Section III. BASIC STRUCTURE OF THE ARMY

7. ARMIES

Hungary is divided into three territorial armies, each consisting of three corps. The First Army with headquarters at Koloszvár (Cluj), facing Rumania, contains the VI, VIII, and IX Corps; the Second Army, with headquarters at Budapest, facing Czechoslovakia, contains the I, II, and VII Corps; the Third Army, with headquarters at Pécs, facing Yugoslavia, contains the III, IV, and V Corps. Thus, by a strategic grouping of corps areas, each army is placed to face one of three possible enemies. (See fig. 5.)

8. CORPS

Each army is divided into three corps, of three divisions. Divisions are assigned to the corps areas in a numbered sequence, as follows: the 1st, 2d, and 3d Divisions belong to the I Corps; the 4th, 5th, and 6th Divisions belong to the II Corps; and so on. The corps areas themselves are arranged roughly in a circle around Budapest and are numbered counterclockwise from I to VII, beginning at Budapest and going west, then south, east, and north. The VIII and IX Corps extend to the southeast into Transylvania. (See fig. 5.)

9. DIVISIONS

a. Introduction.—The basic large unit of the Army is the division. For army administration Hungary is divided into 27 divisional districts, each served by 1 or more *megyék* (singular, *megye*), or counties. After the First World War, when Hungary was partitioned and lost two-thirds of its territory, only 24 of the original 72 *megyék* were left. Thus, between

1920 (Treaty of the Trianon) and 1940 (the Second Vienna Award) each divisional district was served by 1 *megye*. As a result of collaboration with the Axis, 22 of the lost *megyék* were returned to Hungary. However, only 3 new divisions were formed. Thus most of the newly restored *megyék* were not assigned to divisions, but furnished troops to divisions served by the adjoining *megyék*. All *megyék*, old and new, supply men to specialized forces which form part of the General Reserve. In the following table are listed the 46 *megyék* in alphabetical order, with their home stations and the divisions which they serve, so far as these are known. The fourth column gives the divisions which are believed to be served by the 22 *megyék*, or parts of *megyék*, which have been reannexed by Hungary. (See also fig. 45, p. 74.)

**Megye* reannexed by Hungary since the Second Vienna Award; assigned to serve divisions already organized.

10. GENERAL RESERVE

Besides the Air Force, River Forces, and semimilitary forces, the General Reserve contains the following tactical units: the mobile corps, which consists of two cavalry¹ and two mechanized brigades; two mountain brigades; and nine frontier guard brigades. Personnel for the above forces is drawn from the country at large.

11. LINE-OF-COMMUNICATION DIVISIONS

In addition to the 27 infantry divisions accounted for above (par. 9b), a few provisional divisions have been identified in the Soviet Union, where they are acting as line-of-communication troops. (See pars. 15 and 40.) These, however, are formed of temporarily attached regiments drawn from the regular divisions. They bear numbers in the series 101 to 200 and have no home stations.

¹The cavalry brigades may have been mechanized.

Section IV. TRAINING

12. PREMILITARY TRAINING

All boys from the age of 12 until their actual conscription, unless excused for physical reasons, receive premilitary training in an organization called the *Levente*. Training takes place every Sunday and is given by reserve officers and noncommissioned officers according to a schedule prepared at corps area headquarters. It is infantry training and includes the manual of arms, close-order drill, marksmanship with the .22-caliber rifle, customs and courtesies of the service, combat tactics of small units, and maneuvers that sometimes last all day. Similar training is given in the civil gymnasiums, which correspond to the 5th to 12th grades in the United States. Thorough infantry training is given during these years, and a spirit of discipline and love of the mother country is instilled in all.

13. DRAFT OF PERSONNEL

a. For the Army.—The *Levente* keeps a very accurate record of all young men who drill with it and every year submits to headquarters of the corps area a list of those who have attained conscript age. At the present time this is 19. On a prescribed day in May, June, or July, conscription boards (*sorozó-bizottság*) meet simultaneously in each district (*járás*) of the *megye*. (There are customarily five or six in each *megye*.) These boards consist of one or two Army officers, usually of the rank of captain or major, and a medical officer. The men are interviewed and assigned to a branch

according to their qualifications and the needs of the service at the time. The men then go home and await notice to appear (*behívás*), which usually comes about 1 October. At their actual induction into the Army (*jelentkezés*), they are met at the train by non-commissioned officers, who take charge of them. At least two classes of men are always in service and sometimes, depending on the degree of mobilization, more. In the event of mobilization, men may be called up by classes or individually. The class of 1924, for example, was scheduled to be called up in 1943. Men in the General Reserve are called up as needed rather than by classes. There are four classes of men—those on active service (*aktív*), and three classes of reserves: I (under 42 years of age), II (between 42 and 48 years of age), and III (between 48 and 60 years of age).

b. For other forces.—The Air Force and River Forces are composed of men who volunteer for these branches and are specially selected.

14. MILITARY TRAINING

a. Regular officers.—Regular Army officers must be graduates of the Ludovica, or Military Academy, of Hungary. The Ludovica is divided into two parts. Ludovica I trains officers for the infantry, the artillery, the cavalry, the armored force, and cyclists. Ludovica II, also known as Bolyai János Technical Military Academy, provides officers for engineers, signal corps, the River Forces, the Gendarmerie, and intelligence. The Horthy István Flying Academy for the Air Force may possibly be referred to as Ludovica III.

Entrance to these academies is from the civil gymnasiums or military preparatory schools. Competition for entrance is keen, and physical and mental standards are high. Once selected, the applicant is assigned to a branch and must serve a year in the Army before actually entering the academy. The course lasts 3 years, in addition to the year in ranks, and is almost entirely military. Upon graduation the cadet is commissioned a second lieutenant.

b. *Reserve officers.*—Reserve officers are selected from volunteers who have graduated from a civil gymnasium and pass a strict physical examination. They are termed volunteers (*önkéntes*) and enjoy certain privileges in the units to which they are assigned. They are treated as social equals by the officers and are not given menial work. On the other hand, they have to take part in all military drills, and they are subject to unusually strict discipline. During their year of active service they are promoted to the rank of cadet corporal (similar to the German *Fahnenjunker-gefreiter*), and at the end of the year they reach the grade of *hadapród őrmester* (cadet staff sergeant, similar to the German *Fähnrich*). In subsequent years they are recalled for summer maneuvers, which usually last one month, and are promoted one grade each year, first to *zászlós* (officer candidate, similar to the German *Oberfähnrich*) and then to second lieutenant, first lieutenant, and captain, the highest grade that may be filled by reserve officers.

c. *Service schools.*—Service schools are established for the separate branches. The infantry has an excellent small-arms course at Várpalota. Rifles, machine guns, grenades, and howitzers are studied in great detail. Attention is given to theory and to realistic problems in combat firing. The artillery has two service schools, of which the larger and more important, formerly headed by Lieutenant General TERNEGG, is at Hajmáskér. This school combines the functions of artillery school and ordnance proving ground. Service ammunition is used, and its effects on various types of defenses are carefully studied. The cavalry school, which owns some of the finest horses in the world, is at Örkény. The location of the armored force school is not known; it may be at Körmend. A special school in tactics was established by the Germans at Esztergom to train Hungarian and Bulgarian officers, ostensibly to fight the Soviet Union.

d. *General Staff School.*—To be eligible for detail to the General Staff, one of the highest honors in the Hungarian

Army, an officer must have graduated from the General Staff School. Selected officers are trained in a course which was given at the Ministry of National Defense in Budapest and formerly took 3 years. Recently the General Staff Corps was reorganized, and the period of instruction is now probably much shorter.

15. REPLACEMENT TRAINING SYSTEM

The replacement training system is based upon two points: the permanent affiliation of a conscript with the division to which he is originally assigned, and, in present practice, the rotation of active duty among the classes of reserves. Men who have been trained in one division are called to that division with their classes, or individually, for active duty when they are needed. At the same time, men of other classes may be released from the unit and returned to inactive status. Replacements for units engaged on the Eastern Front did not go directly to the field division in which they were trained, but were given refresher training in provisional divisions formed in the rear areas. Thus a man trained in the 7th Division (home station at Sopron) would first be sent to the 105th Line-of-Communication Division where he would become accustomed to field life and where he would receive the latest training in tactics. As replacements were needed by the 7th Division he would be sent forward to his parent organization. After spending the required interval at the front he would be sent back to Sopron on an extended furlough, or even be placed outright on the inactive list.

Section V. ORGANIZATION OF SUBORDINATE UNITS¹

16. ARMIES

In peacetime an army consists of three corps. For operations the allotment of corps to armies is varied as the situation demands. In addition, the following troops constitute army headquarters: headquarters detachment, a tank battalion, an engineer regiment, a signal battalion, a motorized artillery regiment, an aviation group, a motorized antiaircraft battalion, and trains. (See fig. 10, p. 30.)

17. CORPS

a. Corps.—A corps normally consists of three infantry divisions at brigade strength (see par. 18) and the following corps troops: headquarters company, a cavalry squadron, an engineer battalion, a signal company, a motorized artillery battalion, a flight of attached aviation, a motorized antiaircraft battalion, and trains. (See figs. 10 and 30, pp. 30 and 47.) Detailed organization of the corps staff is shown in figure 11, page 31.

b. Mobile corps.—The mobile corps, a part of general reserve consists of headquarters, a tank regiment, two (possibly three) motorized brigades, two cavalry brigades, and trains. (See fig. 12, p. 32.) Its estimated strength is 43,000. (Armored cars and tanks used by the Hungarian Army are shown in figures 6, 7, and 8, pp. 22, 23, and 25.)

¹Charts of organization for the various units are given at the end of this section, beginning on p. 30.

①

②

Figure 6.—Tatra armored cars: ① Tatra armored cars; ② Tatra armored car bearing recognition symbol on its right side.

Figure 7.—Swedish-made 7-ton light tank (Landsverk 60). (The turret armament consists of one 20-mm and one 8-mm machine gun.)

18. DIVISIONS

a. Infantry.—The infantry division varies in strength, according to the degree of mobilization, from an under-strength brigade or a reinforced regiment to a full division. Mobilization is accomplished by the expansion of the unit on the foundation of the peacetime framework. The stages of mobilization may be indicated as follows:

(1) *Peacetime framework.*—The normal basic unit of the army is a light mixed brigade, consisting of one infantry regiment, a group of artillery (a mixed battalion), a troop of cavalry, and small units of supporting arms and services. Most of these elements are under strength. This unit is

called a division. It is expanded for operations but reduced again to this status when it returns from the field to its home station. Its strength is approximately 3,800 men. (See fig. 10, p. 30.)

(2) *Initial expansion*.—The light mixed brigade is expanded on mobilization into a full mixed brigade; that is, the same component units are brought up to full wartime strength of approximately 4,900 men.

(3) *Duplicated*.—The mixed brigade may be duplicated to form a light division, consisting of two infantry regiments, two battalions of artillery, and corresponding supporting arms and services. Its strength is approximately 9,500 men. (See fig. 10, p. 30.)

(4) *Triplicated*.—A full division is created by triplicating the mixed brigade. It then consists of three infantry regiments, three battalions of artillery, and correspondingly increased supporting units. Its strength is approximately 14,000 men.

b. *Motorized*.—Motorized brigades of the mobile corps (fig. 12, p. 32) may be combined to form the equivalent of a motorized division.

c. *Armored*.—The existence of an armored division is doubtful. It is possible that tank elements of the mobile corps and of the cavalry brigades have been mistakenly reported as an armored division.

d. *Line-of-communication*.—Details of organization of the line-of-communication division are not known. It is believed that they are patterned after German Sicherung divisions.¹

19. BRIGADES

a. *Infantry*.—See paragraph 18a (1).

b. *Motorized*.—A motorized brigade (fig. 13, p. 33) consists of headquarters, an armored reconnaissance battalion, a mo-

¹See *Order of Battle of the German Army* (MID, WD, Washington, D. C., February 1944) par. 24d (6), p. 132.

torized engineer company, a motorized signal company, a motorized infantry regiment, two bicycle battalions, a motorized artillery battalion, a motorized antiaircraft battery, a flight of attached aviation, and trains. (A Hungarian personnel and cargo carrier is shown in figure 9.)

Figure 8.—Italian-made Fiat 3-ton tanks. (For the current Hungarian recognition symbol, see fig. 6 ②.)

Figure 9.—Hungarian 6-by-6 personnel and cargo carrier. (Hungarian vehicles bear on the license plate a shield in the national colors of red, white, and green.)

c. Cavalry.—A cavalry brigade (fig. 14, p. 34), a component of the mobile corps, consists of headquarters, a reconnaissance battalion, a motorized engineer company, a motorized signal company, two cavalry regiments, two bicycle battalions, a motorized artillery regiment, a motorized antiaircraft battery, a flight of attached aviation, and trains.

d. Mountain.—Mountain units are organized in brigades, two of which are known to exist. A mountain brigade (fig. 15, p. 35) consists of headquarters, reconnaissance units, an engineer company, a signal company, three mountain infantry battalions, an antitank company, and trains.

e. Frontier guard.—Frontier guard units are organized in brigades. One or more frontier guard brigades (fig. 16, p. 36), of three to seven battalions, is attached to each territorial corps except the first. They are distinguished by the corps number.

20. SMALL UNITS

a. Infantry.—(1) *Regiments.*—An infantry regiment (fig. 10, p. 30) at full strength consists of headquarters, an engineer company, a signal platoon, three infantry battalions, a horse-drawn machine-gun company, an antitank company, a mortar company, and trains. (For detailed organization of the regimental staff, see fig. 17, p. 37.)

(2) *Battalions.*—(a) *Infantry.*—An infantry battalion (fig. 10, p. 30) consists of headquarters, a signal platoon, three rifle companies, a machine-gun company, and trains. (For detailed organization of the battalion staff, see fig. 18, p. 38.)

(b) *Mountain infantry.*—A mountain infantry battalion (fig. 15, p. 35) consists of headquarters, three mountain rifle companies, a battery of mountain artillery, and a heavy-mortar company.

(c) *Frontier guard.*—A frontier battalion (fig. 16, p. 36) consists of headquarters, a bicycle platoon, three rifle companies, a machine-gun company, a battery of 80-mm guns, and a heavy-mortar company. The battalion is the basic tactical unit.

(3) *Rifle company*.—The organization and strength of the rifle company is the same in infantry, mountain, and frontier guard battalions. A rifle company (fig. 19, p. 39) consists of headquarters, four rifle platoons, and trains.

(4) *Machine-gun company*.—The machine-gun company (fig. 20, p. 40) of an infantry, mountain, or frontier guard battalion consists of headquarters, 4 machine-gun platoons, and trains. The regimental machine-gun company has only 3 platoons with 5 officers, 107 enlisted men, and 6 heavy machine guns.

(5) *Antitank company*.—One antitank company is in each infantry regiment, each mountain battalion, and each tank regiment. An antitank company (fig. 21, p. 41) consists of headquarters, three platoons, and trains. It is armed with six 37-mm antitank guns.

(6) *Heavy-mortar company*.—There is one heavy-mortar company (fig. 22, p. 42) in each infantry regiment. It consists of three mortar platoons, each with three heavy mortars, and trains.

b. Artillery.—(1) *Regiments*.—An artillery regiment (fig. 23, p. 43) is found in the duplicated or triplicated brigade. At full strength it consists of headquarters, two 105-mm howitzer battalions, and one 150-mm howitzer battalion. For local protection it is provided with 12 anti-aircraft machine guns. (In the duplicated brigade it consists of 2 battalions.)

(2) *Battalions*.—An artillery battalion (fig. 24, p. 43) is an organic part of every mixed brigade. It consists of two 105-mm howitzer batteries, one 150-mm howitzer battery, an anti-aircraft machine-gun battery, a survey battery, and trains. Corps artillery battalions are motorized and their weapons (batteries) are all 150-mm. They may be found lacking the survey battery.

c. Other arms and services.—(1) *Tank regiment*.—One tank regiment (fig. 12, p. 32) forms a part of the mobile corps. It consists of headquarters, including engineer and signal platoons, one armored-car battalion, one light-tank battalion, one medium-tank battalion, an antitank company, and trains.

(2) *Tank battalions*.—A tank battalion, which consists of headquarters and three tank companies, is an organic part of every army.

(3) *Bicycle battalion*.—There are two bicycle battalions: (fig. 25, p. 44) in each motorized brigade and in each cavalry brigade. Each battalion consists of headquarters, a tank platoon, an engineer platoon, a signal platoon, three bicycle companies, a bicycle machine-gun company, an artillery battery, an antitank platoon, and trains.

(4) *Engineer units*.—Engineer units are organized into regiments, battalions, and companies. A regiment consists of a battalion of combat engineers, a battalion of bridge-building engineers, a labor battalion, and a motorized chemical-warfare company. One regiment is assigned to each army. A battalion, consisting of two companies of combat engineers, and a motorized chemical-warfare company, is assigned to each corps. A company of combat engineers (see fig. 26, p. 45) is organic in each infantry regiment.

(5) *Signal units*.—Signal units are organized into battalions and companies. A signal battalion is assigned to each army, a signal company is assigned to each corps and to each division, and a signal platoon (fig. 27, p. 45) is organic in every infantry regiment and battalion.

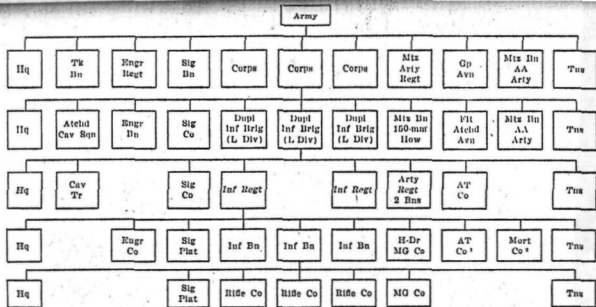

(6) *Cavalry units*.—A squadron of cavalry, consisting of headquarters, and 3 cavalry troops, each armed with 12 light machine guns, is attached to every corps. A troop consisting of headquarters, 4 platoons, 1 machine-gun platoon, and trains, is organic in every infantry regiment.

(7) *Aviation*.—An aviation group is attached to each army. It consists of headquarters, a distant reconnaissance wing, an attack wing, and a bombardment wing. A flight of nine planes is attached to each corps for close reconnaissance.

(8) *Antiaircraft*.—A motorized antiaircraft artillery battalion, consisting of headquarters, a signal platoon, an 80-mm antiaircraft battery, two 40-mm antiaircraft batteries, and a

searchlight and sound-locator battery, is organic in each army and corps.

(9) *Trains*.—Army trains (fig. 28, p. 46) consist of headquarters, two armored railroad trains, a baggage section, a medical section, a ration section, and supply service. Corps trains (fig. 29, p. 47) are similar to army trains but have no armored railroad trains. Division (or brigade) trains (fig. 30, p. 47) consist of headquarters, an ammunition column, loaded horse-drawn ammunition companies, a ration column, loaded horse-drawn ration companies, a baggage truck company, and a field hospital. The elements vary with the stage of mobilization of the division. (See fig. 10, p. 30.)

¹In peacetime the AT Co is reduced to a platoon.

²The following units may also be added: 1 Hv MG Co, with 8 Hv MGs; 1 L Mort Co, with 12 L Mortis; 1 Gun Btry, with 4 Fld guns.

Figure 10.—Organization of the army, the corps, and the infantry division. (In this chart the infantry division is shown at normal combat strength, that of a duplicated brigade. In the peacetime organization the division contains only one regiment. The triplicated brigade, full division strength, differs from that shown above in that it contains three infantry regiments and three artillery battalions.)

Section VI. UNIFORMS AND INSIGNIA¹

21. ARMY UNIFORMS

a. *Officers* (plate I).—(1) *Field uniform*.—The officer's regular field coat is of khaki wool with a turned-down collar (older uniforms have a high standing collar), single-breasted, fastened with five gold buttons in front, and with four patch pockets. The pockets are closed by flaps, cut in two large scallops, fastened by a gold button. Three gold buttons parallel to the arm ornament the cuffs. A gold knotted cord is fastened on the right shoulder (for officers of cavalry, artillery, and troop-train units on both shoulders). Insignia of rank are worn on the collar. Headgear consists of a steel helmet, which resembles the German helmet, and a garrison cap. The cap is khaki wool with a stiff felt visor, which is usually turned up and fastened in front by flaps. At the peak is a red, white, and green cockade with a gold border, and on the left side is a triangular patch in the color of the arm, crossed by three gold stripes. Rank is indicated on the cap by gold chevrons in front. The overcoat is double-breasted, of the same material and color as the coat, with a brown velvet collar, and two rows of six buttons each. It is cut to fit closely at the waist and to flare at the bottom. Cavalry breeches and knee-length boots with a small leather rosette at the knee complete the field uniform. The summer uniform differs from the regular field uniform only in the coat, which is tan and made of light-weight cotton material. (See fig. 31.)

¹For the equivalent ranks of Hungarian and U. S. officers, see par. 51, and fig. 46, p. 99. For plates of uniforms and insignia, see pp. 55 and 56.

Figure 31.—Officers' uniforms. (The two officers in the left foreground and the general in the center are wearing summer uniforms. The officer holding the map (at right) is in regular field uniform. The officer with service cap wears the Air Force service dress uniform.)

(2) *Service dress uniform.*—The service dress uniform for winter consists of the regular field coat worn without a belt, long black trousers with a red stripe along the outside seam, and a cylindrical black cap, or shako, resembling the French kepi. The summer service dress coat is white. Otherwise the service dress uniform is the same as the field uniform.

(3) *Dress uniform.*—The coat of the dress uniform is close fitting, cut rather short, with a high standing collar and gold braided frogs. Color of the coat, design on the sleeves, and color, material, and shape of the headgear differ for each branch or arm, and may vary with different regiments:

b. Noncommissioned officers (plate II).—(1) *Field uniform.*—In the field noncommissioned officers wear the same uniform as officers, with appropriate insignia (fig. 34, p. 53) and minor changes in details.

(2) *Service dress uniform.*—Service dress uniform of non-commissioned officers of the first three grades is the same as that of the commissioned officers with the following exceptions: the shako is brown, and all insignia of rank and the braid on the cap are silver. Uniforms of personnel below the first three grades are identical with those of other enlisted men. Their insignia of rank are brown.

c. *Enlisted men* (plate II).—In general the field uniform of enlisted men (figs. 32 and 33) is similar in design and color to that of officers, but it is made of coarser material. Coat buttons are made of dull plastic. Insignia on the collar and the headgear are brown. The coat has a small roll of cloth at the outer edge of the right shoulder loop to prevent the rifle sling from working off the shoulder. Trousers of foot troops resemble jodhpurs and are buttoned tight along the calf of the leg. Mounted troops wear breeches and boots (cavalry, long boots; artillery and troop-train personnel, half boots). The

Figure 32.—Infantry on the march. (The men in the second rank are armed with Solothurn M31 light machine guns; the others carry Mannlicher M31 rifles.)

overcoat has a large turn-down collar. The summer coat is light-weight cotton khaki, and is made with a fly front. Otherwise the summer uniform is the same as the regular uniform. Except in élite regiments, enlisted men have no dress uniforms.

Figure 33.—Infantry rifleman. (Hungarian soldiers carry their rifles slung as illustrated. The rifle is the Mannlicher M31; the helmet, the Austrian type used during the First World War.)

Grade	U.S. equivalent (approximate)	Collar patches			Headgear
		Stars	Color of base	Braid (on regular uniform only)	
Tábornagy	General	Silver leaves (instead of stars) and gold chevron	Red, with oak- leaf branches	Gold trefoil em- bellished with small loops of gold braid	One very broad, three narrow gold chevrons
Gyalogsági tábornok Lovassági tábornok Tüzérségi tábornok Táborszernagy	Lieutenant general	Three (gold)	Gold	Gold trefoil em- bellished with small loops of gold braid	One very broad, three narrow gold chevrons
Altábornagy	Major general	Two (gold)	Gold	Gold trefoil em- bellished with small loops of gold braid	One very broad, two narrow gold chevrons
Tábornok	Brigadier general	One (gold)	Gold	Gold trefoil em- bellished with small loops of gold braid	One very broad, one narrow gold chevron
Ezredes	Colonel	Three (silver)	Gold on color of arm	Gold trefoil	One broad, three narrow gold chevrons
Alvezredes	Lieutenant colonel	Two (silver)	Gold on color of arm	Gold trefoil	One broad, two narrow gold chevrons

őrnagy	Major	One (silver)	Gold on color of arm	Gold trefoil	One broad, one narrow, gold chevron
Százados	Captain	Three (gold)	Color of arm	Gold trefoil	Three narrow gold chevrons
Főhadnagy	1st lieutenant	Two (gold)	Color of arm	Gold trefoil	Two narrow gold chevrons
Hadnagy	2d lieutenant	One (gold)	Color of arm	Gold trefoil	One narrow gold chevron
Alhadnagy	Warrant (aspirant) officer	One (gold) and gold chevron	Color of arm	Gold loop	One broad, three narrow silver chevrons
Tiszthelyettes	Master sergeant	Three (silver) and silver chevron	Color of arm	Silver loop	One broad, two narrow silver chevrons
Törzsőrmester	Technical sergeant	Two (silver) and silver chevron	Color of arm	Silver loop	One broad, one narrow silver chevron
őrmester	Staff sergeant	One (silver) and silver chevron	Color of arm	Silver loop	One narrow silver chevron
Szaksaszvezető	Sergeant	Three (white)	Color of arm	Brown loop	Three narrow brown chevrons
Tizedes	Corporal	Two (white)	Color of arm	Brown loop	Two narrow brown chevrons
őrvezető	Private, first class	One (white)	Color of arm	Brown loop	One narrow brown chevron
Gyalogos	Private	None	Color of arm	Brown loop	None

Figure 34.—Insignia of Rank.

22. ARMY INSIGNIA

a. Arm and service.—Arm or service is indicated by the color of the patches on the collar and on the left side of the garrison cap (see plates I and II). Colors of the arms and the services are listed below. (The collar patches are of woolen or cotton cloth, except as indicated below.)

COLORS OF THE ARMS

General Staff Corps	red and black
Infantry (including cyclists and frontier guards)	forest green
Cavalry	light blue
Artillery (including antiaircraft)	red
Armored force	dark blue
Engineers	olive green
Signal corps	light blue
Troop trains	dark brown

COLORS OF THE SERVICES

Judge Advocate General	cerise (velvet patches)
Commissary Department	red (velvet patches)
Finance Department	cardinal
Medical Corps	black (officers, velvet; enlisted men, woolen)
Veterinary Corps	bright blue (velvet patches)

b. Rank.—Rank is shown in two places on the Army uniforms: on the collar patches, by a system of stars, oak branches, and chevrons in combination with the color of base of the patch and the material and design of the braided border; on the headgear, by chevrons. One, two, or three stars are worn on the collar patch. Crossed gold oak branches are placed on the rear of general officers' patches. A single chevron appears on the patches of warrant officers and noncommissioned officers. The patch of general officers is gold and red; that of field officers, gold upon a background of the color of the arm or service; that of company officers and enlisted men is the color of the arm or service. The braid on the border of the collar patch of officers is gold and forms a trefoil (clover leaf) at the rear. The braid on the patches of the first three grades of noncommissioned officers is silver, that of other noncom-

missioned officers and of enlisted men is brown; on the patches of all noncommissioned officers and enlisted men, the braid forms a single loop at the rear. (See the table, fig. 34, and plates I and II.)

23. AIR FORCE UNIFORMS

The Air Force uniform for officers is pigeon gray. It consists of a coat with a roll collar, long trousers, and a service cap with a black visor. On the cap a gold cord crosses above the visor, and above the cord is a flying badge and a royal Hungarian crown. (See fig. 31, p. 49.) Insignia of rank, which are worn on epaulets, consist of combinations of gold wings and bars. On flying suits, the insignia of rank are worn on the right sleeve. Noncommissioned officers of the three highest grades wear a uniform similar to that of the commissioned officers except that insignia of rank are silver. Other noncommissioned officers and enlisted men wear the Army uniform.

24. RIVER FORCES UNIFORMS

The uniform of the River Forces is brown. That for officers is similar to the Army service dress uniform, but insignia of rank are worn on the sleeves. Enlisted men wear brown sailors' hats with black ribbons and brown navy jumpers. Rank is indicated on the shoulders.

Section VII. WEAPONS

25. INTRODUCTION

Before the outbreak of the war most Hungarian weapons were manufactured by German firms (Krupp, Mauser, Soluthurn, and Rheinmetall) and the Czech firm, Skoda. Since Germany has been arming its satellites with captured weapons, French, Polish, Belgian, Dutch, and Russian matériel is likely to be found in the Hungarian Army. (Characteristics of the principal weapons are listed in figs. 42 and 43, pp. 64 and 65.)

26. INFANTRY WEAPONS

a. Rifles.—The rifle most likely to be encountered is the Austrian Mannlicher 8-mm (carbine), M31. Some Mauser 8-mm rifles, M35, may be in use. (See fig. 35 ① and ②; see also figs. 32 and 33, pp. 50 and 51.) Parachute and other specialized troops are armed with a submachine gun, M39 (fig. 36 ①), the manufacturer of which is unknown.

b. Machine guns.—The light machine gun used by the Hungarian Army is the Soluthurn M31 (fig. 36 ②), a light, air-cooled weapon supported by a bipod. (See also fig. 32, p. 50.) The heavy machine gun most commonly used is the Schwarzlose M1907/31 (fig. 37, p. 60), a water-cooled, belt-fed machine gun supported on a tripod.

c. Antitank rifle.—The Soluthurn antitank rifle, M36 (fig. 38) is found in the machine-gun company of each infantry regiment, and in the antitank platoon of the bicycle battalion.

d. Mortars.—Stokes, M36, 81.4-mm heavy mortars are found in the heavy-mortar company of each infantry regiment and each mountain and frontier guard battalion. A light 50-mm mortar, manufacturer unidentified, is found in each rifle platoon.

Figure 35.—Rifles in use by the Hungarian Army: ① Austrian Mannlicher 8-mm (carbine), M31; ② Mauser 8-mm, M35.

Figure 36.—Light automatic weapons: ① Submachine gun M39 (maker unidentified); ② Solothurn 8-mm light machine gun, M31.

①

②

Figure 37.—Schwarzlose 8-mm heavy machine gun, M1907/31: ① anti-aircraft mount; ② ground mount.

27. ARTILLERY WEAPONS

a. *Antitank and antiaircraft.*—Antitank artillery consists for the most part of Rheinmetall 37-mm antitank guns. Anti-aircraft artillery consists of Madsen 20-mm and Bofors 40-mm (fig. 39 ②, p. 62) automatic cannon, Ansaldo 75-mm and Bofors 80-mm (fig. 39 ①) dual-purpose guns.

b. *Light field and mountain artillery.*—A variety of light field and mountain artillery is used. It includes the Skoda 75-mm mountain gun, M15; the Ansaldo 75-mm mountain gun, M15/35; and the Skoda 76.5-mm field gun, M18.

c. *Medium and heavy artillery.*—Artillery of 150-mm and over is considered "heavy" by the Hungarians. The following are the medium and heavy artillery weapons that are likely to be encountered: the Skoda 100-mm field howitzer, M14 (fig. 40, p. 63); 105-mm field howitzer, M37 (German *L.F.H. 18*) (fig. 41, p. 63); the Skoda 104-mm field howitzer, M15; the German 150-mm medium howitzer, M14; the Skoda (?) 150-mm medium howitzer, M15; and the Italian 305-mm heavy mortar, M1911/16.

Figure 38.—Soluthurn 20-mm antitank rifle, M36.

Heavy machine gun	1907/31 ³	Schwarzlose	8	85	3,800	2,200	500.
Semiautomatic antitank rifle	36	Soluthurn	20	100			
Antitank gun	36	Rheinmetall	37	792	4,400	600 ⁵	15.
Antiaircraft machine gun		Madsen	20	780	6,500	4,300	200.
Antiaircraft gun	36	Bofors	40	4,300	(vertical) 9,900	(vertical)	100.
Antiaircraft gun	33	Ansald	75	6,480	12,400 (vertical)	9,067 (vertical)	
Antiaircraft gun	29 and 29/32	Bofors	80	3,000	8,700 (vertical)	6,500 (vertical)	23.
Light mortar	39	Unknown	50	45	900		8 to 10.
Heavy mortar	36	Stokes	81.4	183	4,730		25.
Super-heavy mortar		Skoda	140	800	2,800	2,100	

¹The M31 rifle is properly referred to as the A13M or the 31/A.M. The Hungarian designation A31M refers to the weapon usually known as the M1895 Austrian Mannlicher carbine; 31/A.M. refers to a conversion of the M1895 Austrian Mannlicher long rifle into a carbine identical with the A31M.

²Since the straight-pull Austrian Mannlicher action requires no turning of the bolt handle, a maximum rate of fire of 35 rounds per minute is possible.

³A7/31M is the Hungarian designation of the M1907/12 Austrian Schwarzlose machine gun.

⁴A Hungarian handbook states that this weapon can penetrate 15-mm (0.59 inch) of armor at 500 yards.

⁵The handbook referred to in note 4, above, states that the 37-mm gun can penetrate 28-mm (1.1 inches) of armor at 500 yards.

Figure 42.—Characteristics of principal infantry and antiaircraft weapons.

Type ¹	Origin	Caliber (mm)	Length of tube (cal)	Muzzle velocity (ft/s)	Weight of shell (lb)	Maximum range (yd)	Elevation (degrees)	Depression (degrees)	Traverse (degrees)	Weight in action (lb)
Mtn gun, Skoda M15	Austro-Hungarian	75	10.7	1,150	14.3	8,200	45	10	7	1,350.
Mtn gun, Ansaldo M1915/35	Italian	75	183	1,435.5	13.97	10,340	65	10	50	1,760.
Fld gun, Skoda M18	Czech	76.5 ²	30	1,640	17.6	11,375	45	8	8	2,740.

Fld gun, Skoda M15	Austro-Hungarian	104	35	2,130	38.5	13,800	45	10	5.5	6,400.
Fld How, M37 (German 1.F.H.18)	German	105	22.8	1,540	31.79	12,000	40	5	56	3,800.
Fld How, Krupp M14	German	150	14	1,250	92.5	9,150	70	5	8	5,520.
Fld How, Skoda M15	Austro-Hungarian	150	18	1,670	92.5	12,000				11,120.
Fld How, Bofors M31	Swedish	150	24	1,900	90	16,300	45	5	45	11,200.
Mort, M11/16	Italian	305	8	1,480	Hv 835 L 631	10,400 12,000	75	0	120	41,600.

¹Hungarian designations of artillery pieces include date of model and caliber in centimeters. Thus the Skoda 75-mm mountain gun, M15, is referred to as the 7.5-cm 15M, and the Skoda 100-mm field howitzer, M18, as the 10-cm 18M.

²The Hungarian designation of this weapon is 8-cm 18M.

Figure 43.—Characteristics of principal artillery weapons.

Section VIII. MILITARY SYMBOLS

28. BASIC SYMBOLS

a. Introduction.—The principal basic military symbols used by the Hungarian Army are shown below. Many of them resemble those used by the Germans, but the meanings are often different. The Hungarians usually place the numerical designation of the unit to the right of or below the symbol. A small number in parentheses under the symbol indicates the number of guns in the unit. Abbreviations that may be used in conjunction with symbols will be found, after the words for which they stand, in the glossary (par. 55, p. 128). Roman numerals are used to designate corps, organic battalions of the regiment, and platoons; Arabic numerals stand for other units. Corps troops, however, take the Roman numeral of the corps. Units of division or brigade trains are assigned the number of the division or brigade of which they are a part. Army troops sometimes, but not always, bear a number 100 greater than that of the army.

b. Symbols.

(1) *Arms and services.—*

	infantry		signal troops
	motorized infantry		armored
	mountain infantry	 = 	engineer
	artillery		air force
	cavalry		river forces
	bicycle		survey
	supply		medical
	ordnance		veterinary
	labor troops		baggage train

(2) *Units.—*

	GHQ		regiment
	army		battalion
	corps		company
	division		platoon or patrol
	brigade		single soldier

 supply train

(3) *Weapons.*—

	light machine gun		medium field howitzer
	heavy machine gun		heavy field gun
	light mortar		heavy field howitzer
	heavy mortar		mine thrower, heavy mortar
	antitank gun		light antiaircraft gun
	light field gun		medium antiaircraft gun
	light mountain gun		heavy antiaircraft gun
	light field howitzer		armored car
	medium field gun		tank

(4) *Boundaries.*—

	army
	corps
	division
	regiment
	battalion
	company
	reconnaissance

29. COMBINED SYMBOLS

The basic symbols may be combined to show the grouping of units. Figure 44 is a symbolic representation of organization of a triplicated division. The top line shows the various headquarters: 21st Division, 21st Brigade, 21st Division Artillery. The section below, marked "Infantry," represents the component infantry regiments and supporting troops: the 21st, 51st, and 81st Infantry Regiments, the 21st Independent Battalion, and the engineer, signal, machine-gun, antitank, and mortar units of the 21st Regiment and of the 21st Independent Battalion. (The 51st and 81st Regiments are assumed to be similarly composed.) The regiment itself consists of three battalions, each of three infantry companies, represented by the black squares, and antitank and machine-gun companies, shown by symbols in the lower right hand corners. The next line shows mobile troops, the division reconnaissance battalion, with headquarters, armored-car, light tank, bicycle, and cavalry units. The lower portions of the chart in similar fashion indicate the organization of division artillery, technical troops, and trains. (See also fig. 30, p. 47.)

Section IX. NAVY (RIVER FORCES)

30. RIVER FORCES

Having had no outlet to the sea since the First World War, Hungary of course has no Navy. It has, however, a considerable naval tradition and aspires to regain the port of Fiume on the Adriatic. The River Forces, though small, have played an important part in keeping the Danube and its tributaries in Hungary open to navigation despite partisan attacks. They are an integral part of the Army, and their personnel is organized on a military basis into one or more regiments, battalions, and companies. Their equipment includes a number of gunboats armed with two 80-mm guns and several machine guns each, armored launches carrying machine guns, mine layers, and supply and service craft.

Section X. AIR FORCE

31. GENERAL

The Hungarian Air Force is an independent branch of the Armed Forces. It is headed by an Air Force Commandant, with headquarters at Budapest, who is directly responsible to the Minister of National Defense. In time of war the pursuit and bomber units remain under the Air Force Commandant, while the reconnaissance units are detached to the various army corps. On the Eastern Front Hungarian air units have operated under the command of one or another of the German Fliegerkorps.

32. OPERATIONAL COMMANDS

The Hungarian Air Force is made up of 1 air brigade consisting of 5 regiments, numbered 1 to 5, plus some reconnaissance units and 1 naval unit. The first 4 regiments are divided into 2 groups of 2 squadrons each, while the 5th Regiment includes 12 squadrons. The basic unit in the squadron is a flight of 3 aircraft. Each regiment is composed of one type of aircraft only, such as fighters, bombers, or reconnaissance planes. The 5th Regiment consists of 12 army cooperation squadrons, 1 of which is allotted to each army corps. There is also a battalion of parachutists under the Air Force Commandant.

33. PERSONNEL

No estimate is available of the present strength of the Air Force in personnel. At the end of 1939 it comprised 755 officers and 5,320 enlisted men, of whom 2,381 were noncommis-

sioned officers. Of the total not more than 1,200 were pilots. The numbers have undoubtedly been increased considerably since 1939.

34. TRAINING

Most of the officers in the Hungarian Air Force are graduates of the Horthy István Flying Academy at Kassa (Košice). The students there are usually selected from the other military academies, and the training course lasts 3 years. Suitable youths are encouraged to train for service in the Air Force through the Horthy István Flyers' Foundation, a nonmilitary organization financed by popular subscription. Students who have completed the courses conducted by this organization are permitted to perform their conscript service as pilots.

35. AIR BASES

The principal airdromes, which are equipped to handle all types of aircraft and which possess installations for night flights and extensive repair facilities, are located in the vicinity of Budapest and five or six other large cities. At other points are situated a number of smaller fields, suitable as operational bases for fighters or medium bombers, and numerous emergency landing grounds. The level terrain of most of the Hungarian countryside makes it fairly easy during the dry season to adapt open fields for the use of light planes. Many of the Hungarian airfields have been extensively improved during the war, possibly for the use of German aircraft in transit.

36. STRENGTH

The strength of the Hungarian Air Force in first-line airplanes is estimated at a total of 330, distributed as follows: fighters, 100; bombers, 110; and others, 120.

Figure 45.

Section XI. LIST OF LARGE UNITS

37. INTRODUCTION

This section consists of a list of Hungarian larger units—armies, corps, and divisions—with the names of their commanders, particulars of their composition, their home stations, and brief notes on their origin and the campaigns in which they have taken part. (For organization, see sec. IV and figs. 5 and 45, pp. 12 and 74.)

38. ARMIES

First Army

Commander: Col Gen NÁDAY István

Chief of Staff: Col MAKRAY Sándor

Home station: Kolozsvár (Cluj)

Normal composition: VI, VIII, and IX Corps

Originally contained the VI and VIII Corps. After the re-occupation of Transylvania the newly formed IX Corps was added.

Second Army

Commander:

Chief of Staff:

Home station: Budapest

Normal composition: I, II, and VII Corps

Took part in the Russian campaign in 1942-43, when it controlled the III, VI, and VII Corps instead of its normal components. It was severely beaten at Voronezh in January-February 1943. The remnants returned to Hungary in May 1943.

Third Army

Commander: Col Gen CSATAY Lajos

Chief of Staff:

Home station: Pécs

Normal composition: III, IV, and V Corps

Elements of this army participated in the occupation of Yugoslavia. Three divisions have recently served as occupational troops in the so-called Bacska-Baranya area (Bács-Bodrog Megye and Baranya Megye).

Army of Occupation

(Formerly Line-of-Communication Corps)

Commander: Col Gen LAKATOS Géza

Chief of Staff:

Composition: 1st, 18th, and 25th Divs; 102d, 105th, 108th, 118th, 121st, and 200th LC Divs; 6th Frontier Guard Brig; Labor Trs

Believed to have been formed after the defeat of the Second Army from rear area units. During the summer of 1943 its headquarters was at Kiev and it was responsible for the line of communication in the Kiev-Bryansk-Gomel area. It was reinforced at that time by the 1st, 18th, and 25th Infantry Divisions and the 6th Frontier Guard Brigade. It had been withdrawn to the Lwów (Lemberg) area in September 1943.

39. CORPS

I Corps

Commander: Lt Gen NÉMETH József

Chief of Staff: Col KUTHY László

Home station: Budapest

Normal composition: 1st, 2d, 3d Divs; I Cav Sq; I Engr Bn; I Tr Tns

Peacetime corps area, not yet constituted as a field corps. The 3d Division was mobilized in the summer of 1942 and

attached to the IV Corps. This corps was reported mobilizing in March 1943.

II Corps

Commander: Lt Gen AGGTELEKY Béla

Chief of Staff: Col KERESZTES Gyula

Home station: Székesfehérvár

Normal composition: 4th, 5th, 6th Divs; II Cav Sq; II Engr Bn; II Tns; 2d Frontier Guard Brig

Peacetime corps area, not yet constituted as a field corps. The 6th Division was mobilized early in 1942 and attached to the III Corps. The 5th Division was mobilized in the summer of 1943 and replaced the 25th Division at Nagyvárad (Oradea).

III Corps

Commander: Lt Gen BAKAY Szilárd

Chief of Staff: Lt Col KOVÁCS

Home station: Szombathely

Normal composition: 7th, 8th, and 9th Divs; III Cav Sq; III Engr Bn; III Tr Tns; 3d Frontier Guard Brig

Peacetime corps area constituted as a field corps early in 1942, when it comprised the 6th, 7th, and 9th Divisions. It was severely mauled in the battles of Kursk and Voronezh in the winter of 1942-43, after which only remnants returned to Hungary. It is reported that this corps is being reorganized.

IV Corps

Commander: Lt Gen HESZLÉNYI József

Chief of Staff: Col SELLYEY Jenő

Home station: Pécs

Normal composition: 10th, 11th, and 12th Divs; IV Cav Sq; IV Engr Bn; IV Tr Tns; 4th Frontier Guard Brigade.

Peacetime corps area, constituted as a field corps early in 1942, when it comprised the 3d, 10th, and 12th Divisions. It was severely mauled in the Battles of Kursk and Voronezh in the winter of 1942-43, after which only remnants returned to Hungary.

V Corps

Commander: Lt Gen PLATTHY Pál

Chief of Staff: Col LITTOMERICKSKY Oszkár

Home station: Szeged

Normal composition: 13th, 14th, 15th Divs; V Cav Sq; V

Engr Bn; V Tr Tns; 5th Frontier Guard Brig

Peacetime corps area, constituted as a corps to take part in the occupation of the Bacska-Baranya area. The 13th Division was attached to the VII Corps and sent to the Soviet Union.

VI Corps

Commander: Lt Gen FARKAS Ferenc

Chief of Staff: Col ZAKÓ András

Home station: Debrecen

Normal composition: 16th, 17th and 18th Divs; VI Cav

Sq; VI Engr Bn; VI Tr Tns; 6th Frontier Guard Brig

Peacetime corps area. It has recently been reported to be mobilizing. The 6th Frontier Guard Brigade was sent to the Soviet Union in the summer of 1943.

VII Corps

Commander: Maj Gen KISS István

Chief of Staff: Col MOLNÁR István

Home station: Miskolc

Normal composition: 19th, 20th, and 21st Divs; VII Cav Sq;

VII Engr Bn; VII Tr Tns; 1st Frontier Guard Brig

Peacetime corps area, constituted as a field corps in 1942. During the Russian campaign the 21st Division stayed at home and the 13th Division was attached to this corps. In the battles of Kursk and Voronezh, the 13th Division was virtually annihilated. The remnants of the other two divisions returned to Hungary in May 1943. At the present time the VII Field Corps is in the Soviet Union on line-of-communication duties. The VII Territorial Corps is at home.

VIII Corps

Commander: Lt Gen DEZSŐ László

Chief of Staff: Col SZAVAY Sándor

Home station: Kassa (Košice)

Normal composition: 22d, 23d, 24th Divs; VIII Cav Sq; VIII Engr Bn; VIII Tr Tns; 7th and 8th Frontier Guard Brigs

Peacetime corps area, constituted as a field corps at the outbreak of hostilities with the Soviet Union in 1941, when it was a part of the token contribution to the Axis effort. It took part with distinction in the battle of Nikolaev (Vernoleninsk). It is believed to have been demobilized in 1942 with the exception of the 23d Division, which was sent to the Eastern Front, late in 1942, and which suffered heavy casualties in the battle of Voronezh. At present the VIII Field Corps is on line-of-communication duty in U.S.S.R.

IX Corps

Commander: Lt Gen VERESS Lajos

Chief of Staff: Col FÖNAGY János

Home station: Kolozsvár (Cluj)

Normal composition: 25th, 26th, and 27th Divs; IX Cav Sq; IX Engr Bn; IX Tr Tns; 9th Frontier Guard Brig

Peacetime corps area, established after the reoccupation of Transylvania. The component divisions are believed to be at full strength (triplicated) and to form a strong field force on the Rumanian frontier. The 25th Division was sent to the Soviet Union in the summer of 1943. In the corps it was replaced by the 5th Division.

Mobile Corps

Commander: Lt Gen MAJOR Jenő

Chief of Staff: Col KÖSZÖRÜS Ferenc

Home station: Budapest

Normal composition: 1st and 2d Mtz Brigs; 1st and 2d Cav Brigs (now probably mechanized)

Formed in 1940 of two cavalry and two motorized brigades. Saw service in the Soviet Union in 1941 and 1942. The motor-

ized brigades returned to Hungary early in 1942. The cavalry brigades (believed converted into mechanized brigades) suffered heavy casualties in men and equipment in the battle of Voronezh and returned home.

40. DIVISIONS

1st Infantry Division

Commander:

Home station: Budapest

Normal composition: 1st and 31st Inf Regts; 1st Arty Regt

This division was triplicated in the spring of 1943 and sent to the Eastern Front to reinforce the Line-of-Communication Corps. It was engaged in battles during the Soviet advance on Kiev. At present it is believed to be in the Lwów (Lemberg) area.

2d Infantry Division

Commander:

Home station: Budapest

Normal composition: 2d and 32d Inf Regts; 2d Arty Regt

This division is believed to have been sent to Transylvania in the fall of 1943. Its present location is unknown.

3d Infantry Division

Commander:

Home station: Budapest

Normal composition: 15th and 45th Inf Regts; 3d Arty Regt

Left Hungary as a part of the IV Corps in July 1942. Identified in the Soviet Union in September. Last identified in January 1943 at Voronezh where it was virtually annihilated. Remnants returned to the home station in May 1943.

4th Infantry Division

Commander:

Home station: Székesfehérvár

Normal composition: 3d and 33d Inf Regts; 4th Arty Regt

Not identified in battle. At its home station.

5th Infantry Division

Commander: Col LITSAY

Home station: Győr

Normal composition: 16th and 46th Inf Regts; 5th Arty Regt

Left Hungary late in 1942 for the Russian front. Identified at Voronezh in January 1943. Suffered heavy casualties. Returned to its home station in May 1943. Replaced the 25th Division at Nagyvárad (Oradea) in the summer of 1943 when the latter was sent to the Eastern Front.

6th Infantry Division

Commander:

Home station: Komárom

Normal composition: 22d and 52d Inf Regts; 6th Arty Regt

Left Hungary as a part of the III Corps. First identified at Orel in June 1942. Last identified at Voronezh, where it was virtually destroyed. Remnants returned to the home station in May 1943.

7th Infantry Division

Commander:

Home station: Sopron

Normal composition: 4th and 34th Inf Regts; 7th Arty Regt

Left Hungary as a part of the III Corps. First identified at Orel. Last identified at Voronezh, where it was virtually destroyed. Remnants returned to the home station in May 1943.

8th Infantry Division

Commander: Maj Gen MALTARY Árpád

Home station: Szombathely

Normal composition: 5th and 35th Inf Regts; 8th Arty Regt

Not identified in battle. At its home station.

9th Infantry Division

Commander: Maj Gen OSZLANYI Kornél

Home station: Nagykanizsa

Normal composition: 17th and 47th Inf Regts; 9th Arty Regt

Left Hungary as part of the III Corps. Identified in battle at Kursk and at Voronezh. Suffered heavy casualties in February 1943. Returned to the home station in May 1943.

10th Infantry Division

Commander:

Home station: Kaposvár

Normal composition: 6th and 36th Inf Regts; 10th Arty Regt

Left Hungary as a part of the IV Corps in May 1942. It was first identified in battle at Kursk. Suffered heavy casualties at Voronezh in February 1943. Returned to Hungary in May 1943.

11th Infantry Division

Commander:

Home station: Pécs

Normal composition: 8th and 38th Inf Regts; 11th Arty Regt

Not identified in battle. At its home station.

12th Infantry Division

Commander:

Home station: Szekszárd

Normal composition: 18th and 48th Inf Regts; 12th Arty Regt

Left Hungary as a part of the IV Corps in the summer of 1943. Identified in battle at Voronezh, where it was virtually destroyed. Remnants returned to Hungary in May 1943.

13th Infantry Division

Commander:

Home station: Kecskemét

Normal composition: 7th and 37th Inf Regts; 13th Arty Regt

Left Hungary as a part of the VII Corps in June 1942. It was identified in battle at Voronezh, where it distinguished itself as rear guard during the retreat of the Second Army. It suffered heavy casualties. Returned to Hungary in May 1943. Reported sent back to the Eastern Front in September 1943.

14th Infantry Division

Commander:

Home station: Szeged

Normal composition: 9th and 39th Inf Regts; 14th Arty Regt

Not identified in battle. Elements of this division are on line-of-communication duties in the Sombor area of Bacska-Baranya.

15th Infantry Division

Commander:

Home station: Kiskunhalas

Normal composition: 20th and 50th Inf Regts; 15th Arty Regt

Elements of this division are on line-of-communication duties in the Ujvidék area of Bacska-Baranya.

16th Infantry Division

Commander:

Home station: Szolnok

Normal composition: 10th and 40th Inf Regts; 16th Arty Regt

Not identified in battle. At its home station.

17th Infantry Division

Commander:

Home station: Debrecen

Normal composition: 11th and 41st Inf Regts; 17th Arty Regt

Not identified in battle. At its home station.

18th Infantry Division

Commander:

Home station: Békéscsaba

Normal composition: 19th and 49th Inf Regts; 18th Arty Regt

Sent to reinforce the Army of Occupation in the summer of 1943. Reported to be in the Sarny-Lwów (Lemberg) area in January 1944.

19th Infantry Division

Commander:

Home station: Miskolc

Normal composition: 13th and 43d Inf Regts; 19th Arty Regt

Left Hungary as a part of the VII Corps in July 1942. First identified in battle at Voronezh in October 1942. Last identified in January 1943 at Voronezh, where it suffered heavy casualties. Remnants returned to the home station in May 1943. Reported on the Eastern Front (Sarny-Lwów) in January 1944.

20th Infantry Division

Commander:

Home station: Eger

Normal composition: 14th and 44th Inf Regts; 20th Arty Regt

Left Hungary with the VII Corps. First identified in battle at Voronezh in October 1942. Last identified in January 1943 at Voronezh, where it was virtually destroyed. Remnants returned to the home station in May 1943.

21st Infantry Division

Commander:

Home station: Losonc

Normal composition: 23d and 53d Inf Regts; 21st Arty Regt

Not identified in battle. At its home station.

22d Infantry Division

Commander:

Home station: Szatmárnémeti (Satu-Mare)

Normal composition: 12th and 42d Inf Regts; 22d Arty Regt

Believed to have taken part in the Russian campaign of 1941. Returned home with its parent corps (the VIII). Now believed to occupy Carpatho-Ukraine.

23d Infantry Division

Commander:

Home station: Kassa (Košice)

Normal composition: 21st and 51st Inf Regts; 23d Arty Regt

Left Hungary late in 1942. First identified in battle at Voronezh in January 1943, where it suffered heavy casualties. Remnants returned to the home station in May 1943.

24th Infantry Division

Commander:

Home station: Ungvár

Normal composition: 24th and 54th Inf Regts; 24th Arty Regt

Believed to have taken part in the Russian campaign of 1941. Returned home with its parent corps (the VIII). Now believed to be in occupied Carpatho-Ukraine.

25th Infantry Division

Commander:

Home station: Nagyvárad (Oradea)

Normal composition: 25th, 55th? and 58th? Inf Regts; 25th Arty Regt

Mobilized after the reoccupation of Transylvania. Formed part of the defense force against Rumania, but was found to be politically unreliable because of the number of Rumanians in its ranks. Sent to the Soviet front in the summer of 1943.

26th Infantry Division

Commander:

Home station: Kolozsvár (Cluj)

Normal composition: 26th, 56th, and 59th? Inf Regts; 26th Arty Regt

Formed after the reoccupation of Transylvania. It is reported to be triplicated and is part of the defense force against Rumania.

27th Infantry Division

Commander:

Home station: Marosvásárhely

Normal composition: 27th, 57th, and 60th? Inf Regts; 27th Arty Regt

Formed after the reoccupation of Transylvania. It is reported to be triplicated and is part of the defense force against Rumania.

Armored Division

Commander: Maj Gen HORVÁTH Ferenc

Home station: Budapest

Composition: 1st and 2d Cav Brigs (probably mechanized)

This division was formed as a part of the Mobile Corps in 1940 from two cavalry brigades. It is not certain that it exists today as an organization or that it existed as a unit during the campaigns in the Soviet Union in 1941 and 1942. Hungarian armored units were identified on the Soviet front in 1941 and 1942, and at present some armored units are held in reserve on the Yugoslav border. It is possible that these are not organized into an armored division but operate as independent brigades or even smaller units.

101st Line-of-Communication Division

Commander:

Composition:

Identified on line-of-communication duty in Lwów (Lemberg) in January 1943. Remained in the Kiev-Gomel area through the summer of 1943. Participated in battles during the Soviet advance on Kiev. At present it is believed to have been withdrawn to the Lwów (Lemberg) area.

102d Line-of-Communication Division

Commander:

Composition:

First identified in the vicinity of Stalingrad in August 1942. It is believed to have been strengthened since then. It remained on line-of-communication duty in the Bryansk-Gomel area through the summer of 1943. Believed to have been engaged in battle during the Soviet advance on Kiev. It is believed to have been withdrawn to the Lwów (Lemberg) area.

103d Line-of-Communication Division

Commander:

Composition:

First mentioned in the vicinity of Stalingrad in August 1942. It is probably disbanded.

105th Line-of-Communication Division

Commander:

Composition: 4th Inf Regt (from 7th Inf Div)

First identified in Ukraine in June 1942. It is believed to have been strengthened in February 1943. During the summer of 1943 it remained in the Bryansk-Gomel area on line-of-communication duty. After being engaged in the Kiev area it was withdrawn to the Lwów (Lemberg) area in November 1943.

108th Line-of-Communication Division

Commander:

Composition: 47th Inf Regt (from 9th Inf Div)

First identified in May 1942 in Ukraine and in November of the same year near Stalingrad. Remained on line-of-communication duties through the summer of 1943. It was withdrawn to the Lwów (Lemberg) area in November 1943.

121st Line-of-Communication Division

Commander:

Composition: 40th Inf Regt (from 14th Inf Div)

First reported in June 1943 at Berdichev. Remained there through the summer of 1943 on line-of-communication duties. Withdrawn to Lwów (Lemberg).

200th Line-of-Communication Division

Commander:

Composition: 31st, 46th and 51st Inf Regts (from 1st, 5th, and 6th Inf Divs)

First identified in August 1942 near Kharkov. Now probably disbanded.

Section XII. TABLES OF IDENTIFIED UNITS

41. ARMIES AND CORPS

Unit	Normal components	Headquarters	Commander
First Army—	VI, VIII, IX Corps.....	Kolozsvár (Cluj).....	Col Gen NÁDAY István.
Second Army—	I, II, VII Corps.....	Budapest.....	
Third Army—	III, IV, V Corps.....	Pécs.....	Col Gen CSATAY Lajos.
Army of Occupation.	102d, 105th, 108th, 118th, 121st LC Divs, 6th Frontier Guards Brig.....	Lwów (Lemberg).....	Col Gen LAKATOS Géza.
I Corps.....	1st, 2d, 3d Divs.....	Budapest.....	Lt Gen NÉMETH József.
II Corps.....	4th, 5th, 6th Divs.....	Székesfehérvár.....	Lt Gen AGGTELEKY Béla.
III Corps.....	7th, 8th, 9th Divs.....	Szombathely.....	Lt Gen BAKAY Szilárd.
IV Corps.....	10th, 11th, 12th Divs.....	Pécs.....	Lt Gen HESZLÉNYI József.
V Corps.....	13th, 14th, 15th Divs.....	Szeged.....	Lt Gen PLATTHY Pál.
VI Corps.....	16th, 17th, 18th Divs.....	Debrecen.....	Lt Gen FARKAS Ferenc.
VII Corps.....	19th, 20th, 21st Divs.....	Miskolc.....	Maj Gen KISS István.
VIII Corps.....	22d, 23d, 24th Divs.....	Kassa (Košice).....	Lt Gen DEZSŐ László.
IX Corps.....	25th, 26th, 27th Divs.....	Kolozsvár (Cluj).....	Lt Gen VERESS Lajos.
Mobile Corps.	1st, 2d Cav Brig, 1st, 2d Mtz Brig.....	Budapest.....	Lt Gen MAJOR Jenő.

Section XIII. SENIOR OFFICERS

50. INTRODUCTION

a. Use of the roster.—The roster below contains the latest available information on Hungarian senior officers. All known general officers are included, as well as those field officers who are believed to be of current or potential importance. They are listed in alphabetical order, without regard to rank or branch. The roster contains the names of all general officers who were on the active list on 1 January 1943, plus a few who reached general officers' rank since then. It is believed that any who were last identified prior to that date are now retired. Retired general officers and certain retired colonels are included in the index because of their potential political importance.

The age given is that reached in 1944. The date under the heading "Date Last Identified" is usually but not invariably that on which the officer was last known positively to be occupying the post listed under "Appointment". Under "Remarks" is information regarding the officer's arm, previous service, character, etc., which may give an indication of his ability and political sympathies.

b. Hungarian names.—Hungarian names are often reported incorrectly. The spelling is difficult; and confusion arises from the Hungarian practice of reversing names. Throughout this book the family name is given first in the Hungarian manner and is written in capital letters, thus: CSATAY Lajos. Sometimes several words follow the proper name. They may include titles, such as "nemes" (an hereditary title of nobility, roughly equivalent to the German "von"), "gr." (the abbreviation for "gróf," count), or "vitéz" (an honorary title, meaning "hero," which is conferred by the government for bravery). Hungarian officers who have received a doctorate normally include the title "Dr." in their names: for example, "Maj Gen DESEO

László nemes Dr." Often the name of the family estate or place of birth is included. This usually ends in "i", occasionally in "y" (meaning "of") and should not be capitalized. Thus in LAKATOS Géza vitéz csikszentsimoni, the family name is LAKATOS, the given name is Géza, and the name of the estate or birthplace is Csikszentsimon. (German-influenced sources may report this officer as Géza LAKATOS von Csikszentsimon.)

In order to avoid confusion of given names with family names, the following list of common Hungarian Christian names is included, together with the German and English equivalents where such exist:

HUNGARIAN	GERMAN	ENGLISH
Ágost	August	Augustus
Aladár		
Alajos	Alois; Aloys	Alois
András	Andreas	Andrew
Antal	Anton	Anthony
Árpád		
Ártúr	Artur; Arthur	Arthur

Vince.....	Vincenz.....	Vincent
Waldemár.....	Waldemar.....
Zoltán.....

51. RANKS

Designations of rank in the Hungarian Army have been reported in several different ways, because of the difficulty of translation, the lack of exact equivalents, and the German influence on nomenclature. Figure 46 indicates the various forms in which such ranks may appear in different sources. The right-hand column indicates the usage which has been adopted in this book. It is believed that there are at present only three grades of general officers in the Hungarian Army. They are referred to in the following roster as "Maj Gen," "Lt Gen," and "Col Gen." It is thought that the rank of "Gen of Inf, Cav," etc., on the active list, has been abolished and is now held only by a few retired officers. When the exact rank is not known, "General" is used.

Hungarian rank	German usage	U. S. equivalent	Rendered in English by Hungarians	Adopted in this book
Hadnagy.....	Leutnant.....	2d Lieutenant.....	Lieutenant.....	2d Lieutenant
Főhadnagy.....	Oberleutnant.....	1st Lieutenant.....	First Lieutenant.....	1st Lieutenant

52. ROSTER OF SENIOR OFFICERS

Name (age)	Rank	Appointment	Date last identified	Remarks
ABT	Gen	Formerly Comdr of reserve units of Second Army in the Soviet Union, and of "Hungarian Security Troops"	26 Feb 43	Name probably garbled.
AGGTELEKY, Béla	Lt Gen	Comdr, II Corps	28 Oct 43	Comdr, 1st Inf Div as colonel in Apr 41.
ALGYA-PAP Zoltán alsókormányal	Maj Gen		3 Oct 43	Decorated in Oct 43.
ALSÓVISZOKA Gábor vitéz	Col		19 Apr 43	Accompanied Regent on his visit to Hitler in spring 43.
AMBROZY Arnold zsedényi	Col	C of S, AA Defense Forces	Jan 43	GSC. May still be a lieutenant colonel.
AMON Ferenc	Col		3 Oct 43	Decorated in Oct 43.
ANDRAS Sándor	Col	C of S, Air Force (?) (See VORDOS Géza, Col)	Jan 43	GSC.
ARNOVOY	Gen (?)	In Donets area in Spring 43	29 Mar 43	Probably a colonel; comdr, 31st Regt, in Spring 43.
ARVAY Győző	Maj Gen		Jan 43	
ASZTALOSSY Aladár vitéz	Maj Gen		Jan 43	
AULICH Imre	Col	Formerly Comdr of an arty unit in II Corps	1939	Probably retired.
BAITZ Oszkár beodrai	Maj Gen		Jan 43	
BAJNOCZY József dési vitéz (56)	Col Gen	DCGS and Permanent Deputy of the Minister of Defense	Oct 43	Inf. Headed section in Defense Ministry and commanded GS School.
BAKAY Konstantin vitéz	Maj Gen		17 Sep 43	Decorated in Sep 43. (Probably an incorrect identification of BAKAY Szilard, below.)

BAKAY Szilárd vitéz	Lt Gen	Chief, Section 21, Bur. of Ground Forces, Defense Ministry	26 Nov 43	Was colonel, Comdr 17th Inf Div in Apr 41.
BALÓ Zoltán vitéz	Col	Comdr, III Corps	Jan 43	Retired.
BALOGH Sándor vitéz	Lt Gen	Retired	26 May 43	
BÁNFALVY István vitéz	Maj Gen		Jan 43	
BARABÁS Emil (58)	Lt Gen	Retired 21 Nov 40	23 Nov 40	Inf. Headed Section in Defense Ministry, Writing History of German Campaigns in Nov 40.
BARCA-UJFALUSSY Egon vitéz	Maj Gen	Retired	28 Sep 43	Decorated in Sep 43.
BARCZAY György	Col		3 Oct 43	Decorated in Oct 43.
BARDOCZY Ferenc vitéz	Maj Gen	Deputy Inspector of Inf	Jan 43	
BARTALITS	Col	Formerly (Sep 43) military attaché to Ankara	24 Sep 43	
BARTHA	Lt Col	Liaison Officer with German Army in Sofia	5 Aug 43	
BARTHA Károly (60)	Gen of Ord	Retired 1938	20 Mar 40	Engr. Combat Engrs. Technical Inspector of Army. Chief, SOS, Chief of Bureau in Defense Ministry. Defense Minister in 1938.
BELDY Alajos vitéz (55)	Lt Gen	National Leader Pre-military Training and Athletics, and Chief, Bureau of Premilitary Training, Defense Ministry	16 Nov 43	Cav. Military attaché to London and Washington. Head of Bureau of Precedence in Defense Ministry. Long tour in Germany and Italy in fall 41. Reported to be pro-U. S. and not very pro-German. Admires German more than British organization.
BENKŐ Béla vitéz	Maj Gen		Jan 43	

Name (age)	Rank	Appointment	Date last identified	Remarks
BEOETHY Dezső	Col	Formerly (1939) Comdr, NCO School at Jutas	1939	Probably retired.
BERECZ Sándor	Maj Gen		Jan 43	
BEREGFY Károly (56)	Lt Gen	Formerly (probably till late Aug 43) Comdr, VI Corps	30 Jun 43	Inf. GSC. Head, Section Defense Ministry. Comdr, Mtz Brig. Comdr, GS School. Directed course in strategy at War College, Budapest. Reported in Jan 43 to be a probable future Comdr, Army of Occupation. See LAKATOS Géza, below.
BERKOVICH Brunó	Gen	Was Comdr, 1st Frontier Brig, in Apr 41	Apr 41	Probably retired.
BEZ	Gen(?)	Was Comdr, 7th Tank Brig, in Russia in Mar 43	29 Mar 43	Name probably garbled; may be a colonel.

ZSEDÉNYI Zoltán nemes	Col	Chief of Protocol, Defense Ministry (not the same as Bureau of Precedence)	Jan 43	
ZSOMBOLY Béla zombolai	Maj Gen		Jan 43	

Section XIV. GLOSSARY OF MILITARY AND RELATED TERMS

53. INTRODUCTION

This section is designed to enable intelligence personnel who do not read Hungarian to recognize documents of military importance and to understand their general meaning. Common abbreviations are given in parentheses. Verbs are given usually in the third person singular. Hungarian makes frequent use of compound words, prefixes, and suffixes. To find a compound word in the glossary, it may be necessary to look for each of its components separately. No English-Hungarian section is given, since it is not expected that this glossary can be used as a phrase book.

54. PRONUNCIATION

a. Vowels.—Hungarian vowels have approximately the same sounds as do those of other continental European languages. A close vowel is pronounced very close. An acute accent (') placed over a letter indicates that the vowel is close. Umlauts indicate both quality and quantity of vowel sounds. The short umlaut is made like the German umlaut (¨); the long umlaut is a double acute accent (˝). Vowels are pronounced approximately as follows:

- a like *ou* in *bought*
- á as in *arm*
- e as in *met*
- é like *a* in *fate*
- i like *e* in the first syllable of *event*
- í like *e* in *eve*

- o as in *obey*
- ó as in *old*
- ő like u in *church*
- ö like u in *urn*
- u like oo in *boot*
- ú like o in *two*
- ü as in German *Müller* or French *tu*
- ű as in German *Führer* or French *rus*

b. Consonants.—Except as noted below, consonants have approximately the same value as in English:

- c, cz like *ts* in *fits* or German *Zug*
- cs like *ch* in *church*
- gy like *d* plus a glide sound as in *endure* or French *mon dieu*
- j like *y* in *yoke*
- l followed by *y* or *j* approximates *ll* in French *fillette*
- s like *sh* in *ship*
- sz like *s* in *sail*
- y as in *yet*, except that final *y* is equal to *i*
- zs like *s* in *usual*

c. Accent.—The main stress is placed on the first vowel in each word.

55. HUNGARIAN-ENGLISH (*MAGYAR-ANGOL*) GLOSSARY

A

a	the
ábra	diagram, figure
abroncs	tire, hoop
acél	steel
ad	gives, issues, transmits
adag	ration, issue, portion, dose
adó	transmitting station, tax
ág	branch
ágy	bed
ágyú (á.)	gun
akad	sticks fast; finds
akadály	obstacle

akar	is willing, wishes, intends, tries
akna	mine
aknamező	mine field
al-	sub-
ál-	false, dummy
alacsony	low, subordinate
alak	form, shape
alakulat	unit, formation
alakzat	tactical formation, parade formation
alap	base, basis
alatt	under
alezredes (alez.)	lieutenant colonel
alhadnagy (alhdgy.)	warrant officer
alkalmaz	employs, uses
áll	stands, halts
állandó	fixed, permanent
állapot	condition, state
állás	position, gun position
álláspont (áp.)	position, location
állat	animal
állategészségügyi (áéü.)	veterinary
állomás	station
állomásparancsnok (ápk.)	railroad station master (or officer in charge)
állomány	total, strength
alosztály (aloszt.)	subunit, company, battery
altábornagy (altbgy.)	lieutenant general, lieutenant field marshal (U. S. major general)
alsó	lower, of regimental or lower status
által	by, through
általános	general, universal
altiszt (alti.)	senior noncommissioned officer
angol	English
anyag (A.)	matériel
anyagi vezérkari osztály	
(I.c.)	supply section, general staff
anyakönyv	register, permanent roster

ár.....	price, tide, flood
áram.....	current, electricity
arc.....	face
arcvonal.....	front, sector
árkász.....	engineer
árok.....	trench
árt.....	injures
árul.....	betrays, reveals, sells
ás.....	digs
át.....	across, over
átkarol.....	outflanks; envelops
átkel.....	crosses, passes
átszál (ít) óállomás.....	
(AÁ.).....	transfer station
áttör.....	breaks through, penetrates
az.....	the
azonnal.....	immediately
azonos.....	identical

B

bal (b.).....	left, lefthand
baleset.....	accident, mishap
barát.....	friend, monk
be.....	in
becsül.....	esteems, estimates
becsületügy (bü.).....	matter of honor, personal dispute
béke.....	peace
bekerít.....	surrounds, encircles
bélyeg.....	stamp (rubber, adhesive)
béna.....	lame, disabled
bent.....	indoors, inside
beoszt.....	allots, allocates, disposes
berendezés.....	installation, arrangement
beszállásol.....	installs, billets
beszél.....	speaks
beteg (B.).....	sick
betegszállító vonat (B.).....	hospital train

betör.....	breaks in, makes initial penetration
bezárólag (bez.).....	inclusive, inclusively
bezárva (bez.).....	inclosed, surrounded
bir.....	is strong enough
bíz.....	trusts
biztos.....	sure, certain, secure
biztosít (biz.).....	secures, assures protection
borítói.....	covering note
börtön.....	prison
büntet.....	punishes
búvár.....	diver

C, Cs

cél.....	target, objective
cím.....	title, address
csak.....	only, exclusively, not until
csapat (csap.).....	troop, body of troops, company
csapatrend.....	tactical disposition of troops
csapattest.....	unit of regimental status
csata.....	battle
csatár.....	combat soldier
csavar.....	screw
csendő (cső.).....	gendarme, rural policeman
csendőrség (cső.).....	gendarmerie, rural police
csere.....	exchange
cső.....	barrel (of gun or rifle), tube, pipe
csónak.....	boat, canoe
csoport (csop.).....	group, task force, detachment
csütörtök.....	Thursday

D

dandár (dd.).....	brigade
darab (db.).....	piece
dél (D.).....	south, noon
délkelet (DK.).....	southeast
délnyugat (DNY.).....	southwest
díj.....	pay, salary, fee, reward

dísz	ceremonial
dob	throws, drops, drum
dolgozik	works, labors
dolog	thing, matter
domb	hill
dönt	decides, settles
döntő	decisive
drót	wire
drótnélküli	wireless
dugattyú	piston

E

egészségügyi (eü.)	medical
egy	one
egyenértékű	of equal value or status
egyenruha	uniform
Egyesült Államok	United States
egység	unit
éj, éjszaka	night
ejtőernyős	parachutist, paratrooper
ék	wedge, ornament
el	away, off
él	point (head of column) ; lives, is alive
élelem (élm.)	food, rations
élelmez (élm.)	provisions (v.), supplies with rations
élelmezés	food supply
elem	element
éles	sharp, live, primed
elhelyez	disposes, locates, assigns
eljárás	procedure
ellát	furnishes, provisions, supplies
ellen	against
ellenfél	enemy (individual opponent)
ellenőriz	controls, checks, inspects
ellenség (elg.)	enemy (opposing force)
ellentámadás	counterattack
előnyomul	advances, presses forward

előőrs (eörs.)	outguard
előőrstartalék (eörstart.)	advance guard reserve
előosztág (eog.)	advance party
előre	forward
előtt	before
elővéd (evéd.)	advance guard
elővédzőm (evédz.)	advance guard support
előzetes értesítés	advance notification, warning order
első	first, foremost
elv	principle
ember	man, person
emel	raises, mounts, lifts
én vagyok	I am, it is I
enged	allows, yields
engedelmeskedik	obeys
épít (é.)	builds
ér	reaches, hits, vein
érdek	interest (in something)
erdő	forest
érez	feels, touches
érkezik (érk.)	arrives
erő	force, strength, power
ért	understands
érték	value, worth
és	and
esik	falls, drops; rains
észak (É.)	north
északkelet (ÉK.)	northeast
északnyugat (ÉNY.)	northwest
eszköz	instrument
év	year
evez	rows, paddles
ezer	thousand
ezred (e.)	regiment
ezredes (ezds.)	colonel
ezredközvetlen (ek., EK.)	organic units of regiment
ezredparancsnok (epk.)	regimental commander

F

fa.....	tree, timber, wood
faj.....	type, kind, race, breed
fal.....	wall
falu.....	village
fedez.....	covers, affords cover
fegyelem.....	discipline
fegyver.....	weapon, arm
fegyvernem.....	arm (of service)
fegyverszünet.....	truce, armistice
fehér.....	white
fejezet.....	chapter
fejlődik.....	develops, deploys
fék.....	brake
fekete.....	black
fekszik.....	lies down
fel.....	up
fél.....	half; fears, is afraid
feladat.....	task
felderít (feld.).....	reconnoiters
felderítő járőr (fejőr.).....	reconnaissance patrol
felderítő osztag (feog.).....	reconnaissance party
felé.....	towards
felel.....	answers, responds
felső (f.).....	higher, upper
felszerel.....	equips
felvételező állomás.....	
(f.á., F.Á.).....	distributing point
felvételező hely.....	
(f.h., F.H.).....	distributing point
felvonul.....	goes into position, passes in review
fent.....	upstairs, at the top of the hill
fényszóró (fényysz.).....	searchlight
fénytávbeszélő állomás- csoport (fénytács).....	signal lamp section
fér.....	fits, can be contained or carried

fertőzik	is contaminated, is infected
fészek	nest
figyel	observes
figyelőhely	observation post
fizet	pays
fő-	chief, principal
főcsapat (főcs.)	main body
fog	takes, picks up; will, shall; tooth, cog
fogad	receives, accepts; vows, promises, bets
fogantyú	handle
fogatolt	horse-drawn
főhadiszállás	general headquarters
főhadnagy (fhdgy.)	first lieutenant
fok	degree
föld	earth, land, ground
flyamerő (foe.)	river force
flyamerő, flyamerőség	
(fő.)	river guard
flyamerzár (Fz.)	boom, river obstruction
flyó (f.)	river, serial, flowing
főparancsnok	commander in chief
forгалom	traffic
fordít	turns, causes to turn
fordul	turns, faces
fővezér (főv., Főv.)	supreme commander
fővezérség (főv.)	high command
fűgg	hangs, depends
fűl	ear
fűlelőőrs	listening outpost
fűrdő (F.)	bath, delousing installation
fűzet	unbound volume, pamphlet

G, Gy

gát	barrier, obstruction, dam
gazdasági hivatal (gh)	finance office
gázol	fords, wades across

gázvédelem (gazv.)	gas defense, defense against gas attack
gép	machine
géppágyú (gá.)	machine gun or rapid-fire cannon
gépkocsi (gk.)	automobile
gépkocsioszlop (gko.)	column of motor vehicles
gépkocsizó (gk.)	motorized
géppuska (gp.)	machine gun
gép vontatású (gv.)	tractor-drawn
gerinc	backbone, spine, crest, ridge
gödör	pothole, crater, foxhole
golyószóró (gsz.)	automatic rifle
gomb	button, knob
gond	care
gőz	steam
gránát (gr.)	shell, grenade
gránátvető	mortar
gula	pyramid, stack of arms
gyakorol	drills, practises, exercises
gyalog	on foot
gyalogos (gy.)	infantryman
gyalogság (gyság.)	infantry
gyalogsági tábornok	
(gytbk.)	general of infantry
gyanú	suspicion
gyár	factory
gyenge	weak
gyógy	cure, convalescence
gyors	rapid, mobile, light
győz	wins, is victorious
gyújt	lights, sets on fire
gyűjt	collects, assembles, stores
gyülekezik (gy.)	assembles, comes together
gyűrű	ring, circle

H

náboru.....	war
nadi.....	military, martial
